

Kajal Raj

Front-end Developer | Software Engineer

+91 8092074275 raj11kajal@gmail.com India
in kajalraj kajalraj Portfolio

Front-end Developer & Software Engineer 3 years of professional experience building user-friendly and high-performance web applications using JavaScript, TypeScript, React, and Next.js. I focus on creating clean interfaces, managing state with Redux Toolkit, and handling data efficiently using React Query. I have experience working with APIs and solving real-world problems in agile teams. I'm also familiar with Node.js, Express, and MongoDB, allowing me to contribute to full-stack development.

Work Experience

Wits Innovation Lab, Chandigarh, India

Frontend Developer (Software Engineer)

07/2022 – 10/2025

Developed and maintained responsive, high-performance web applications used in production environments.

Built scalable and reusable UI components, improving consistency and development efficiency across projects.

Integrated RESTful APIs and ensured smooth handling of dynamic data for seamless user experiences.

Gained hands-on experience with backend development, contributing to API integration and basic server-side logic using Node.js and Express.

Applied system design fundamentals such as component architecture, state management, and performance optimization to build scalable applications.

Improved application performance using techniques like lazy loading, code splitting, and efficient state handling.

Collaborated with designers and backend developers to deliver end-to-end features in agile workflows.

Contributed to feature development, bug fixes, and continuous code improvements across multiple projects.

Education

Master of Computer Applications

07/2021 – 07/2023

Lovely Professional University(LPU), Jalandhar, India

Key Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming, Data Mining, Web Technologies.

Bachelor of Computer Applications

06/2017 – 06/2021

R.M College, Bihar, India

Key Coursework: Data Structures, Database Management Systems (DBMS), Software Engineering, Computer Fundamentals, Programming in C/C++, Object-Oriented Programming, Web Programming, Mathematics.

Technical Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS

UI & Styling: Tailwind CSS, Material UI, Ant Design, Styled Components

State & Data: Redux Toolkit, React Query, Context API, GraphQL (Apollo Client)

Backend (Basic): Node.js, Express.js

Data & Databases: MySQL, MongoDB

AI & Tools: OpenAI API, GitHub Copilot, Claude, Prompt Engineering, Git, GitHub, GitLab, Postman, VS Code

Projects

■ **LinkedIn Clone | React, TypeScript, Tailwind CSS, Daisy UI, Node.js, Express, MongoDB**

Built a full-stack social platform with user authentication, profiles, and post sharing.

Developed features like feed, comments, connection requests, and notifications.

Created a responsive and easy-to-use UI for smooth user interaction.

Implemented backend services for authentication, API handling, and data management, along with features like email notifications.

■ **Basic Mining | Next.js, TypeScript, Redux Toolkit, Material-UI**

Developed the frontend of a cryptocurrency mining platform with buy, sell, and auction functionalities.

Developed responsive and user-friendly interfaces using Next.js and Material-UI for product listings, pricing, and auction management.

Implemented CRUD operations for managing products, listings, and auction-related workflows through RESTful API integration.

Built reusable UI components and implemented Redux Toolkit for scalable state management and maintainable architecture.

Optimized application performance and ensured responsiveness across multiple devices and screen sizes.

■ **Plan-IT (Project Management Tool) | React.js, TypeScript, Ant Design, Redux Toolkit, React Query**

Built an Agile project management tool for sprint planning and task tracking.

Implemented drag-and-drop dashboards, customizable workflow lanes, backlog management, and CRUD operations for tasks.

Designed a responsive UI and integrated APIs using React Query and Redux Toolkit for efficient state management.

Optimized application performance and collaborated with backend developers for seamless integration.

■ **Food Delivery App | React, Bootstrap, Redux**

Developed a responsive food ordering application with dynamic menu display and cart functionality.

Implemented add/remove items, quantity updates, and automatic total price calculation.

Focused on clean UI design and smooth user experience across devices.

■ **Portfolio**

Designed and developed a responsive personal portfolio showcasing projects, frontend skills, and technical experience.

Implemented interactive UI features, theme customization, and an AI-powered portfolio assistant using Google Gemini LLM integration.

Built with AI-assisted development workflows.

Languages

■ **English** Professional proficiency

■ **Hindi** Professional proficiency

■ **German** Elementary (A1)
